Academic Appointments

Primary

2005 – present: Professor, Department of Earth Sciences, Memorial University, Canada
2001 – 2005: Associate Professor, Department of Earth Sciences, Memorial University, Canada
1997 – 2001: Assistant Professor (Industrial Research Chair), Department of Mechanical and Manufacturing Engineering, University of Calgary, Canada

Other

2014 – present: Visiting Professor, Department of Geoinformatics and Applied Computer Science, AGH University of Science and Technology, Cracow, Poland
2011 – present: Visiting Professor, Department of Mathematics, Politecnico di Milano, Italy
2009 – 2011: Visiting Research Collaborator, Department of Geosciences, Princeton University, USA
2008 : Visiting Scholar, Berkeley Seismological Laboratory, University of California, Berkeley, USA
2001 – 2007: Petro-Canada Research Chair in Applied Seismology, Department of Earth Sciences, Memorial University, Canada
2000 – present: Adjunct Professor, Department of Mathematics and Statistics, University of Calgary, Canada
1997 – present: Director, The Geomechanics Project

Research Leadership

The Geomechanics Project

The Geomechanics Project was created in 1997 by Michael A. Slawinski with industrial sponsorship and a support of the University of Calgary. Slawinski has been the director of The Project since its inception.

Originally, The Project was hosted at the University of Calgary, in the Department of Mechanical Engineering. Since 2001, The Project is in the Department of Earth Sciences at Memorial University in St. John's, where Slawinski became the Petro-Canada Research Chair in Applied Seismology.

The Geomechanics Project is an interdisciplinary research group composed of graduate students, postdoctoral fellows and research associates from physics, mathematics and computer science. Their work focuses on inverse problems and material properties, within continuum mechanics, with emphasis on elasticity theory and its generalizations.

Research funding

The research funding of Michael A. Slawinski for almost two decades has been in the context of The Geomechanics Project. The sources of his funding—which allows for the support of graduate students, postdoctoral fellows and visiting scholars as well as for research trips and acquisition of computer equipment—are academic, governmental and industrial; these funds are received in both North America and Europe.

Industrial Experience

1997: Senior Geophysicist, Petro-Canada Oil and Gas, Calgary, Canada

1996 – 1997: Geophysicist, PanCanadian Petroleum Limited, Calgary, Canada

1993 – 1995: Geophysicist (Special Projects), Talisman Energy Inc., Calgary, Canada

1988 – 1992: Geophysicist, Chevron Canada Resources, Calgary, Canada

1987: Geophysicist, Husky Oil Operations, Calgary, Canada

1985 – 1986: Geophysicist, Gulf Canada Corporation, Calgary, Canada

Education

1992 – 1996, Ph.D.: Seismic anisotropy; 'On elastic-wave propagation in anisotropic media: Reflection/refraction laws, raytracing and travelttime inversion', University of Calgary, Canada

1986 – 1988, M.Sc.: Seismic anelasticity; 'Investigation of inhomogeneous body waves in an elastic/anelastic medium', University of Calgary, Canada

1982 – 1985, B.Sc.: Geophysics, University of Calgary, Canada

1981 – 1982, DEUG (Diplôme d'études universitaires générales): Université de Paris XI, France

Publications

In most publications stated below, multiple authors are listed alphabetically

Books
